Education

VIT Bhopal University, Bhopal

B. Tech in Computer Science & Engineering

2022 - 2026

8.48/10 CGPA

Bhartiya Vidya Bhavan's Mehta Vidyalaya, New Delhi (CBSE)

Intermediate XII (Senior-secondary)

2009 - 2021

85.1%

High School X (Secondary)

93.3%

Technical Skills

Programming Languages: Python, C++, Dart

Full-Stack Development: Flutter, HTML, CSS, Javascript, Firebase

Core Concepts: Data Structures, Object Oriented Programming, Operating Systems, DBMS

Tools & Technologies: Git, Pandas, Scikit-learn, Matplotlib, OpenPyXL, PyMuPDF, OpenAI API, LangChain

Experience

KPMG India – Software Intern

Jun 24 - Sep 24

- Built a Generative AI automation system using OpenAI API and LangChain, automating the generation of structured financial and compliance reports, reducing manual effort by 70% and improving delivery turnaround by 50%.
- Developed a scalable Python-based document parser using PyMuPDF, pdfplumber, and regex, extracting key financial metrics, dates, and compliance tags from 100+ PDF documents with an accuracy of over 90%.
- Automated Excel report generation workflows using Pandas and OpenPyXL, producing client-specific outputs and reducing formatting time by 60%.
- Designed an internal email summarization tool that processed and summarized email threads, extracting key action items using LLMs, enhancing reading efficiency for analysts by 40%.
- **Tech Stack:** OpenAI API, LangChain, Python, PyMuPDF, pdfplumber, regex, Pandas, OpenPyXL

Projects

ShopSeva – Local Vendor Digitization Platform

- Built a cross-platform mobile app to digitize local vendors through shop discovery, inventory tracking, and order management
- Designed modular UI for vendor/customer sides using Flutter and Figma; integrated Google Maps for location services
- Implemented Firebase Auth and Firestore for secure login, real-time sync, and data storage
- **Tech Stack:** Flutter, Dart, Firebase, Firestore, Google Maps API, Figma

Heart Attack Prediction – Machine Learning Model

- Built a predictive ML model to assess heart attack risk using patient health metrics and clinical indicators.
- Performed data preprocessing, feature selection, and trained models including Logistic Regression and Random Forest
- Achieved 88% model accuracy with ROC-AUC; visualized key insights using Matplotlib
- **Tech Stack:** Python, Scikit-learn, Pandas, Matplotlib

NoteNest – Web-Based Note-Taking & Productivity App

- Developed a responsive web app to manage notes, tasks, and documents with personalized workflows
- Built intuitive UI using HTML, CSS, and JavaScript with smooth navigation across devices
- Integrated Firebase and Firestore for real-time sync, authentication, and data storage
- **Tech Stack:** HTML, CSS, JavaScript, Firebase, Firestore

Certifications

- **HackerRank Python Certification**
- **NPTEL Cloud Computing (IIT KGP) – Elite Certification**
- **TCS iON Career Edge – Young Professional**

Jan 24

May 24

Sept 25

Achievements

- Solved 100+ Problem Solving questions based on DSA on Leetcode
- HackerRank 5 Star in Java and Python

Co-Curricular

Android Club, VIT Bhopal – Operations Team

Dec 22 - Mar 23

- Organized the “App-a-thon” event and delivered Android app development sessions for 100+ students, managing logistics and boosting technical engagement on campus.

Extra-Curricular

- House Captain – Bhartiya Vidya Bhavan
- Represented **New Delhi District** U17 Football Team as Attacking Midfielder
